Clinical Case Report

(For Collection of Cancerous Tissue)

Informed Consent

I personally informed this patient that a specimen(s) would be collected to be used for research purposes. I reviewed the **RESEARCH SUBJECT INFORMATION AND CONSENT FORM** with the patient and answered any questions the patient had. The patient then signed the consent form as a free and voluntary act. A copy of this informed consent document will be retained at our institution.

Clinical Information

GENERAL INFORMATION				
Date of Birth (mm/dd/yyyy)	**Height**	**Marital Status**	**Race**	**Temperature**
Gender	**Weight**		**Blood Pressure**	**Heart Rate**

HISTORY OF PRESENT ILLNESS

Chief Complaints: Consistant cough ; blood in the sputum. tired of eating.

Symptoms: weight loss

Clinical Findings:

Performance Scale (Karnofsky Score):

☐ 100 Asymptomatic ☐ 80-90 Symptomatic but Fully Ambulatory ☒ 60-70 Symptomatic, in bed less than 50% of day
☐ 40-50 Symptomatic, in bed more than 50% of day, but not bed ridden ☐ 20-30 Bed Ridden

CURRENT MEDICATIONS

DIAGNOSTIC STUDIES		
Study	**Results**	**Date**
Ultrasound		
X-Ray		
CT ✓	A tumour was found in the right lung	[redacted]
Endoscopy		
MRI		
Biopsy		

CLINICAL DIAGNOSIS	
Preoperative Clinical Diagnosis	
R. LUNG CANCER	
Location of Suspected Involved Lymph Nodes	**Location of Suspected Distant Metastasis**
Clinical Staging	**Date of Diagnosis**
T 2 N 0 M 0 **Stage:** I B	[redacted]

Treatment Information

SURGICAL TREATMENT		
Procedure		**Date of Procedure**
Resection of the upper lobe of the right lung		[redacted]
Primary Tumor		
Organ	**Detailed Location**	**Size**
Lung Tumor		4 x 3 x cm
Extension of Tumor		
Lymph Nodes		
Description	**Location of Lymph Nodes**	**# of Lymph Nodes**
Palpable, Non-Dissected Lymph Nodes		
Dissected Lymph Nodes		
Distant Metastasis		
Organ	**Detailed Location**	**Size**
Surgical Staging		
T 2 N 0 M 0 **Stage:** I B		

NEOADJUVENT THERAPY (Chemo, Radiation, Immuno, Hormonal, or Molecular)

CONSOLIDATED DIAGNOSTIC PATHOLOGY FORM*

Microscopic Appearance:

1. ***Histological pattern:***

CELL DISTRIBUTION	+	-	STRUCTURAL PATTERN	+	-
Diffuse		X	Streaming		
Mosaic	X		Storiform		
Necrosis		X	Fibrosis		
Lymphocytic Infiltration	X		Palisading		
Vascular Invasion		X	Cystic Degeneration		
Clusterized		X	Bleeding		
Alveolar Formation		X	Myxoid Change		
Indian File		X	Psammoma/Calcification		

2. ***Cellular features:***

Squamous	+	-	Adenomatous	+	-	Sarcomatous	+	-	Lymphomatous	+	-
Squamoid Cell			Glandular cell	X		Round Cell			Large Cell		
Spindle Cell			Cell Stratification	X		Fibroblast			Small Cell		
Keratin			Secretion	X		Osteoblast			RS Cell/RS Like		
Desmosome			Intracyt. Vacuole	X		Lipoblast			Inflam. Cell		
Pearl			Gland formation	X		Myoblast			Plasma Cell		
Otherwise Specified: D1 90%, D2 70%, D3 80%, D4 80%											

2. ***Cellular Differentiation:***

Well	Moderately	Poor
	X	

3. ***Nuclear Atypia:***

Nuclear Appearance	0	I	II	III
Aniso Nucleosis			X	
Hyperchromatism			X	
Nucleolar Prominent			X	
Multinucleated Giant Cell			X	
Mitotic Activity			X	
Nuclear Grade			X	

Histological Diagnosis: Papillary Adenocarcinoma, G2
